#### **Notice of Public Hearing**

#### Regarding the Establishment of Skaneateles Water District Number 6 and the Acquisition, Construction and Installation of Water System Improvements

NOTICE IS HEREBY GIVEN that a public hearing shall be held by the Town Board of the Town of Skaneateles at 7:00 p.m. on April 17, 2023 regarding the Establishment of Skaneateles Water District Number 6 and the Acquisition, Construction and Installation of Water System Improvements.

A copy of the Map, Plan and Report and related materials is available for review at the Town Clerk's Office of the Town of Skaneateles, 24 Jordan Street, Skaneateles, New York or at <a href="https://www.townofskaneateles.com">www.townofskaneateles.com</a>. An opportunity to be heard in regard to this proposed Water District and the Acquisition, Construction and Installation of Water System Improvements will be given at the hearing to those favoring or opposing the same, as well as any comments. Communication in writing in relation thereto may be filed with the Town Board or at such hearing.

Said Hearing will be held on Monday, April 17, 2023 at 7:00 pm in person at the Skaneateles Town Hall, 24 Jordan Street, Skaneateles, NY 13152 and via Zoom at <a href="https://us02web.zoom.us/j/85067465560">https://us02web.zoom.us/j/85067465560</a> Meeting ID: 850 6746 5560 Passcode: 741229 or dial by your location +1 646 876 9923 US (New York). At that time, all persons will be heard or have an opportunity to provide written comment.

Dated: Skaneateles, New York

March 21, 2023

#### 1. BACKGROUND AND AUTHORIZATION

Portions of the existing Town of Skaneateles water distribution service area experience service below standards. The Town of Skaneateles also contains areas in which water service provided by private wells is inadequate. In these areas, water is imported on trucks by several land owners. The Skaneateles public water system does not currently have an adequate level of service for expansion into these areas of failing wells. This report is the first step in the identifying of a project that will bring the water system to current standards and allow the extension of the public system to areas with failing wells. On August 4, 2016, the Town Board authorized the preparation of this map plan and report by resolution.

#### 2. PROPOSED NEW WATER DISTRICT AND IMPROVEMENTS

A new elevated storage tank is proposed to the south of Andrews Road near the top of the hill approximately 2000 feet to the east of County Line Road. Figure 1 (Appendix A) shows the location of this site. This site is one of the highest locations in Town and is also adjacent to the areas with both inadequate service and failing wells. This site is not currently adjacent to a public water line. In order to construct a tank on this site, the public water main would need to be extended. A new water line will be connected to the existing 8-inch diameter main on NYS Route 20 at County line Road. The new main will run south along County Line Road, east along Andrews Road to the tank site. The new main will then continue to the east along Andrews Road then to the north and connect to the existing 8-inch diameter main along West Lake Road in the vicinity of the Skaneateles Country Club. Figure 1 (Appendix A) shows this water line layout.

A new tank to the south of Andrews Road will be located outside the existing consolidated water district. This will require the creation of a new water district. The new district will include the area bounded by County Line Road, Andrews Road, Kane Avenue, and NYS Route 20, as well as the area immediately surrounding those roads. The locations of the extended water lines described above will bring public water service to an area that currently experiences inadequate service from private wells. This area consists of single family houses, agricultural lands, and multiple equestrian facilities.

#### 3. EXISTING SYSTEM DESCRIPTION

The Town of Skaneateles purchases water from the Village of Skaneateles. The Village water system contains two storage tanks located on the same site in the vicinity of the northeast corner of the Village. These tanks are filled by pumps through the distribution system and a transmission line. One tank is elevated and the other is a surface stand-pipe. The Town distribution system is connected to the Village distribution system at several locations, each of which is metered. In the past, the Town owned and operated a small surface reservoir located on the same site as the Village tanks. The Town has recently disconnected this surface reservoir from the distribution system.

For some time, portions of the Town distribution system have not met 10-State Standards relative to pressure, flow, and storage volume. Recent improvements inside the Village have improved the working pressure in certain eastern portions of the Town. The working pressure in western portions of the Town is still sub-standard. Fire flows are still a concern in various parts of the Town, primarily west of the Village.

As part of this project, the most recent water distribution model of both the Town and Village systems was used. This model was developed in cooperation of both municipalities using WaterCAD Version V8i, designed and distributed by Bentley Systems, Inc. A fire flow analysis was performed for both public systems. During this work, several minor updates to the models were implemented based on information taken from two reports:

- Village of Skaneateles, NY Water System Asset Management Plan GHD March 2013
- Town of Skaneateles West Side Water Storage Facility Evaluation C&S Engineers, Inc.
  - April 2000

### 4. HYDRAULIC MODELING

A complete comparison of available fire flows under both existing conditions and proposed conditions is shown in in Appendix D. A selection of nodes is shown in the adjacent table. Town nodes are shown in bold font. Fire flow values highlighted in green meet the minimum requirements, while values highlighted in red do not. The locations are selected to illustrate the effects of the system improvements. The locations are presented with the larger improvements at the top of the chart. As expected, the larger changes in available fire flows tend to occur on the west side of the distribution system, closer to the site of the new tank. System improvements on the west side would provide a benefit to the entire system, with noticeable benefits as far east as Lakeview Circle. The complete table is included as Appendix D.

**Fire Flow Improvements** 

			FIRE FLO	W (gpm)

East Genesee St at Lakeview Circle	J-214	500	1,025	1,037
East Street at East Elizabeth Street	J-359	3,000	3,500	3,500

#### 5. PROPOSED DISTRICT BOUNDARIES

The proposed new water district is generally to the southwest of the Village of Skaneateles. The district extension contains frontage along County Line Road on the west, Andrews Road on the south, and Kane Ave / West Lake Road on the west. A diagram showing the extension is contained in Appendix A. A detailed description of the district extension is included in Appendix E.

#### 6. PROPOSED INFRASTRUCTURE CONNECTIONS

The proposed water main extension will connect to the Town's system in two locations: near the southern end of the existing 8-inch water main on West Lake Street and near the western end of the existing 8-inch water main NYS Route 20 (Genesee Street). A pre-fabricated in-line pump station will be installed near the West Lake Street connection. This pump station will feed a dedicated fill line for the new tank. The need for a small hydro-pneumatic tank to buffer the effects of the pump station on the Village system will be evaluated. The need for differential pressure zones will be evaluated. In the event that differential pressure zones are preferred, the piping manifold will be arranged such that water from the Town zone can flow into the Village during higher flows such as fire flow events.

#### 7. DISTRICT IMPROVEMENT COSTS

The estimated cost for the proposed improvements is \$7,350,000. A detailed breakdown of this cost is provided in Appendix C. These costs include estimated costs for engineering, construction administration and construction inspection. Not included in the above costs are the typical residential "Hook-Up Fee" for connection to the Town's new water main. District residents who initially connect to the system via the services installed to their front property boundaries would not be charged a fee, but later connections will be charged a fee based on the cost to the Town, estimated at \$1,500.00. The costs also do not include the connection from the street line curb box into the individual home, as these are on private property and costs will vary substantially depending on the distance to the home and the site conditions involved with the connection. For the purposes of this report, the private portion of the water service installation cost from the street line into the house is estimated to be an average of \$1,350 per home, not including the water meter, which will be paid for by the Town.

### 8. PROJECT FINANCING AND PROJECTED USER FEES

All financing options will be considered by the Town, but at this time it is assumed that private financing will likely fund the project. An estimated interest rate of 5.5% for a 40 year financing period is projected for the project. The annuity factor for this term and rate is 0.0248. Given the nature of the project and the benefits to the existing district as well as the Village, the project cost will be borne in part by the existing water customers. Customers within the existing, preproject water district will be attributed a smaller share of the project cost compared to similar customers in the new district, as described below. In this calculation, the Village does not contribute the cost of the project.

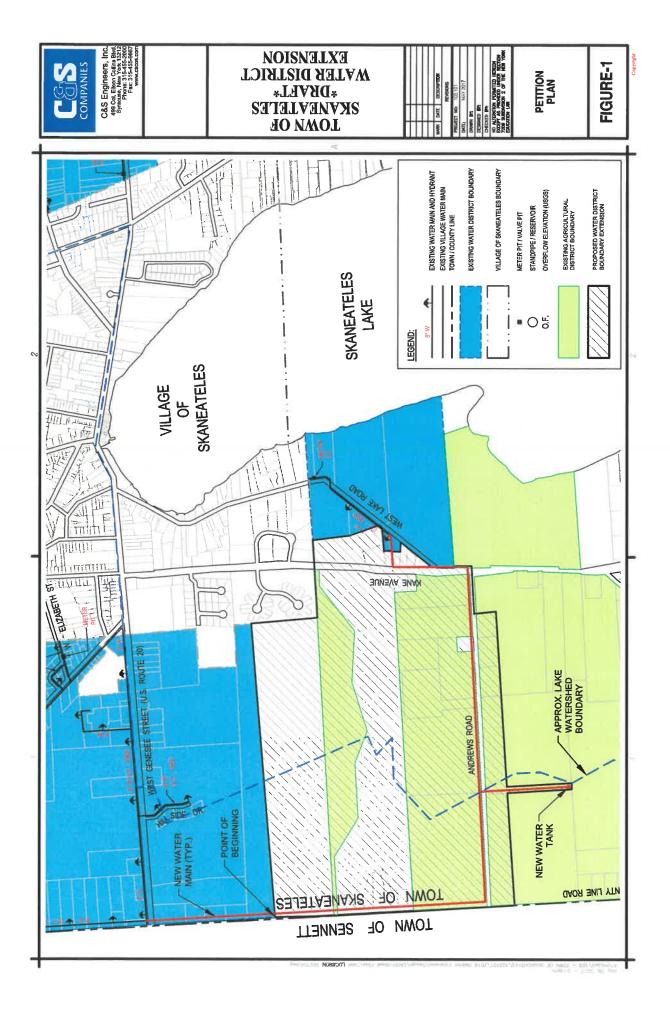

It is proposed that a special assessment system be utilized to charge each parcel inside the proposed district on an equivalent dwelling unit (EDU) basis:

- A single family residence (i.e. one (1) EDU) in the proposed water district will be charged for 1.0 unit.
- An equestrian facility will be charged based on the number of boarding stalls, at a rate
  calculated based on assumed water usage, as detailed in Appendix B. The rate is
  approximately equal to 1 EDU per 5 stalls. Dwellings on these parcels will be added to
  this charge, as applicable.
- Lots in an agricultural district (without dwellings) will be charged for 0.5 EDU.
- Developable vacant parcels, not in an agricultural district, would be charged 0.5 EDU.
- In the existing water district, existing units will be charged a portion of the debt corresponding to the assets that will benefit them. This includes the water tank and associated filling infrastructure. See Appendix B for details.

Using this method of assessment there are an estimated 36.6 EDU's in the new district and 1,084 in the existing district. Tables showing the accounting of the EDU's are included as Appendix B. The estimated first year total annual cost per single-family residence in the new water district, including the estimated debt service charge and water purchase cost would be \$1,020. The estimated additional annual cost per single family residence in the existing water service areas would be \$151 for the life of the bond. See Appendices B and C for details.

Description of District Extension

Town of Skaneateles Consolidated Water District Extension June 2017

The Town of Skaneateles Consolidated Water District Extension of October 2016 shall be bounded and described as follows:

All that tract or parcel of land situated in the Town of Skaneateles, County of Onondaga, and State of New York being part of Farm Lots 35 and 37 in said Town and being more particularly described as follows:

Beginning at a point at the southwesterly corner of the existing Skaneateles Consolidated Water District, said point being at the centerline of County Line Road;

Thence westerly along the southern boundary of the portion of the existing Skaneateles Consolidated Water District formerly known as Water District #3, a distance of about 4,771.18 feet to a point at the southeasterly corner of the existing Skaneateles Consolidated Water District formerly known as Water District #3, said point also being on the Village of Skaneateles westerly corporation boundary;

Thence southerly along the eastern boundary of lands of John H. O'Neill as described by Tax Map Parcel (TMP) 048.-01-39, said line also being a portion of the Village of Skaneateles westerly corporation boundary, a distance of about 1,078.35 feet;

Thence easterly along the northern boundary of lands of Scott C. and Mary Ellen Winkleman as described by TMP 048.-01-23.1, said line also being a portion of the Village of Skaneateles southerly corporation boundary, a distance of about 784.55 feet to a point on the westerly boundary of Kane Avenue;

Thence easterly along the same bearing across the right-of-way of Kane Avenue, said line also being the southerly boundary of the Village of Skaneateles, a distance of about 111.7 feet;

Thence easterly along the same bearing along the northern boundary of lands of Skaneateles Country Club, Inc. as described by TMP 048.-01-24.1, said line also being the southerly boundary of the Village of Skaneateles, a distance of about 377.46 feet to the northeasterly corner of said lands of Skaneateles Country Club, Inc., said point also being the northwesterly corner of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5;

Thence southerly along the eastern boundary of said lands of Skaneateles Country Club Inc., said line also being the westerly boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about

616.44 feet to a point at the northwesterly corner of lands of H. Douglas and Georgia K. Pinckney as described by TMP 049.-01-02;

Thence southerly along the eastern boundary of said lands of Skaneateles Country Club Inc., said line also being the westerly boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, said line also the westerly boundary of lands of H. Douglas and Georgia K. Pinckney, a distance of about 553.47 feet to a point on the northwesterly boundary of West lake Road, said point also being the southern corner of lands of H. Douglas and Georgia K. Pinckney;

Thence southwesterly along the northwesterly boundary of West Lake Road, said line also being a boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about 69.13 feet to a point at a southeastern corner of the lands of Skaneateles Country Club Inc.;

Thence westerly along the northerly boundary of lands of Jane E. Walsh as described on TMP 049.-01-04.1, said line also being a boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about 385.8 feet to a corner point of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5;

Thence southerly along the boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about 125 feet to a point on the southern boundary of the lands of Jane E. Walsh, said point also being a corner point of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5;

Thence westerly along the boundary of lands of Benjamin F. and Carolyn A. Turner as described on TMP 049.-01-05, said line also being a boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about 15 feet to the point at the northwesterly corner thereof, said point also being a corner point of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5;

Thence southerly along the boundary of lands of Benjamin F. and Carolyn A. Turner said line also being a boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about 135.2 feet to the point at the southwesterly corner thereof, said point also being a corner point of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5;

Thence easterly along the southerly boundary of lands of Benjamin F. and Carolyn A. Turner, said line also being a boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about 156.8 feet to its intersection with the northwesterly boundary of West Lake Road, said point also being a corner point of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5;

Thence southwesterly along the northwesterly boundary of West Lake Road, said line also being a boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about 650 feet to its intersection with the easterly boundary of New York State Route No. 41A, said point also being a corner point of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5;

Thence southerly along the eastern boundary of New York State Route No. 41A in two segments of about 100 feet and about 250 feet, said lines also being boundaries of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, to a point at the southwesterly corner of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5;

Thence easterly along the northern boundary of lands of Sandy Beach NY LLC as described on TMP 049.-02-01.1, said line along the southerly boundary of the portion of the Skaneateles Consolidated Water District formerly known as Water District #5, a distance of about 25 feet;

Thence southerly through the lands of Sandy Beach NY LLC, a distance of about 280.13 feet, to a point that would intersect with the extension of the centerline of Andrews Road;

Thence westerly along the aforementioned extension of the centerline of Andrews Road a distance of about 771.23 feet to the point of its intersection with the extension of the eastern boundary of the lands of Wellington Living Trust and Lewis Wellington as described on TMP 048.-02-03.4;

Thence southerly along the aforementioned extension of the eastern boundary of the lands of Wellington Living Trust and Lewis Wellington a distance of about 356.77 feet to the southeasterly corner of said lands;

Thence westerly along the southerly boundaries of the lands of Wellington Living Trust and Lewis Wellington, the lands of Patrick M O'Connor and Catherine J O'Connor as described by TMP 048.-02-03.2, and the lands of Allan Lewis Wellington and Lisa M. Wellington as described on TMP 048.-02-03.3, and into the lands of Amanda C. Cregg as described on TMP 048.-02-02, a distance of 2,834.45 feet to a point;

Thence southerly through the lands of Amanda C. Cregg a distance of about 1,053.58 feet to a point on the southerly boundary of said lands;

Thence westerly along the southerly boundary of lands of Amanda C. Cregg a distance of about 100 feet to the southwesterly corner of said lands;

Thence northerly along the westerly boundary of lands of Amanda C. Cregg a distance of about 1,053.58 feet to a point;

Thence westerly along the extension of the southern boundary of the lands of Allan Lewis Wellington and Lisa M. Wellington a distance of about 1,818.40 feet to a point at the centerline of County Line Rd, said point also being on the boundary of the Town of Skaneateles;

Thence northerly along the westerly boundary of the Town of Skaneateles a distance of about 3,882.30 feet to the Point of Beginning, all as shown on a map entitled "Petition Plan – Town of Skaneateles Consolidated Water District Extension – Figure 1" as made by C&S Engineers, Inc. and dated June 2017, and having the File No. 103.101.
